TECHNICAL CURRICULUM DEVELOPER | INSTRUCTIONAL DESIGNER

Detail-focused Instructional Designer with extensive experience creating technical training solutions for self-paced learning environments, plus a track record of facilitating and delivering instructor-led and remote training. Passion for creating inclusive and accessible learning experiences. Skilled in cross-functional collaboration with engineers and product teams to develop developer-facing content, leveraging tools like Articulate Rise, Camtasia, and Learning Management Systems. Experienced in curriculum development for complex technical platforms. Committed to building data-driven learning experiences that empower developers and technical users.

COMPETENCIES

Instructional Design | Curriculum Development | eLearning Development
Accessibility and Inclusive Design | Learner Feedback and Course Iteration | SCORM Packaging and Publishing
Agile Collaboration | Cross-Functional Teamwork | Generative AI Tools

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) - Herndon, VA **May 2022 - July 2025**
Technical Curriculum Developer (Remote)
Built scalable self-paced learning content for global AWS audiences, collaborating with engineers and product teams to ensure accuracy, accessibility, and measurable impact.

- Developed 20+ technical courses across AWS's strategic domains (machine learning, security, DevOps, and analytics), reaching 150,000+ learners with 45%+ completion rates and an average CSAT of 4.36/5.0.
- Led the async conversion design for four instructor-led security courses, rebuilding instructor mediation into interactive self-paced experiences, rated 4.4 to 4.6 stars across 300+ reviews as of early 2026.
- Created instructional materials using Articulate Rise, Storyline, Camtasia, Amazon Polly, and Transcribe, simplifying complex AWS concepts for developer and technical audiences.
- Built a browser-based text replacement utility for Rise courses, improving accuracy over AI-based alternatives and simplifying updates across lessons, including alt text.
- Partnered with product managers, engineers, and UX teams to validate technical accuracy and learner relevance, accelerating adoption of new AWS services.
- Served as an Accessibility Ambassador in the CDa11y program; volunteered among the first to complete the organization's new accessibility review assessment, and my completed rubric was adopted as the reference key for subsequent reviewers.
- Reviewed and revised published courses in response to learner feedback and performance data as part of the ongoing content lifecycle.
- Participated in early internal testing of generative AI tools for course seed content and business document drafting, and used AI-assisted development to build the browser-based Rise text update utility.

Camping World - Lincolnshire, IL **September 2020 - May 2022**
Instructional Designer (Remote)
Supported training for retail and corporate operations across 12,000+ employees nationwide, developing scalable learning experiences for compliance, onboarding, and technical skills.

- Designed eLearning in Articulate Storyline and Rise supporting onboarding and compliance across a nationwide dealership network.
- Rebuilt a paper-based technician evaluation as an iPad instrument in Articulate Storyline, extending it with custom JavaScript so evaluators could capture per-item notes while moving through an inspection out of order, flag any skipped items at the submission gate, and submit every item with its notes to the exported score report. It replaced the paper form across the RV program.
- Partnered with SMEs across dealership operations to translate complex processes into interactive training modules.
- Published and maintained course content in the Bridge LMS, keeping assigned learning assets and the course catalog current as material was revised and retired.
- Built a Make (Integromat) LMS API automation that cleared a retired course's enrollments from a single course-ID input, avoiding a multi-day, team-wide manual cleanup per the manager's estimate.

ADP - Norfolk, VA **August 2017 - August 2020**

Instructional Designer | July 2019 - August 2020

Designed and developed digital learning solutions across multiple business domains, creating engaging and accessible training to support adoption of new processes and systems.

- Built simulated practice activities in Articulate Storyline that reproduced a live tool's interface, giving learners hands-on repetition without the cost of standing up a lab environment.
- Applied gamification, voice-over, and interactive elements in Storyline and Rise to increase engagement and comprehension.
- Diagnosed that client support specialists knew the material but were defaulting to memory instead of the troubleshooting guide during live calls. Designed a scenario-based animated video series and an open-book assessment that required learners to navigate the guide itself.
- Partnered with SMEs to translate complex payroll, HR, and compliance processes into clear, accessible eLearning modules, helping employees adopt new systems with greater confidence.

Learning Consultant | August 2017 - July 2019

Facilitated technical training sessions for payroll, HR, and compliance tools, delivered both virtually and in-person.

- Took over a three-day, remotely delivered course reported to be scoring outside the acceptable satisfaction range as written. Rebuilt every walkthrough around a learner-led format, replacing the original instructor-demonstrated approach, and reworked the delivery for engagement. Ran it on a two-week cadence for over a year with satisfaction consistently in the upper 90s, tracked in the LMS; the course became mine to deliver.
- Earned ADP's internal Facilitator Excellence certification, recognizing delivery and learner engagement.
- Supported clients and employees in gaining confidence with ADP systems, contributing feedback to improve future training design.

InMotion Hosting - Virginia Beach, VA **January 2012 - August 2017**

Lead Technical Trainer | August 2014 - August 2017

Led onboarding and technical training for new hires in web hosting support, managing 3-4 overlapping cohorts of ~4 trainees each over 12-week cycles.

- Designed and facilitated eLearning and instructor-led training covering technical troubleshooting and customer service skills for new hires in web hosting support.
- Determined from observation that most new-hire call failures traced back to delayed escalation, a bigger factor than gaps in technical knowledge, and built persona-driven mock calls that required learners to escalate properly under realistic pressure. Manager requests for remedial training on recent graduates dropped from several per cohort to roughly one every two to three cohorts.

Support Team Lead | June 2013 - January 2014

Temporary coverage assignment overseeing daily support operations, scheduling, and team coordination for mid-shift teams.

- Identified and resolved interdepartmental workflow gaps, improving communication between support and escalation teams.

Technical Support Representative | January 2012 - August 2014

Provided front-line technical support for web hosting clients, consistently meeting quality and service benchmarks.

- Offered feedback to improve internal documentation, helping streamline issue resolution for both clients and peers.

EDUCATION AND CERTIFICATIONS

Bachelor of Science (B.S.): Media Studies | Concentration in Web Design
Minor: Computer Science
Radford University - Radford, VA

AWS Certified Cloud Practitioner
AWS Certified AI Practitioner (Early Adopter)

TOOLS AND TECHNOLOGIES

Articulate Rise, Storyline, Camtasia, Vyond, Kahoot
Canvas, Litmos, Bridge, Moodle, Docebo | Amazon Web Services (S3, Polly, Transcribe)
JavaScript, HTML/CSS | OBS, Snagit, Audacity, Photoshop
Confluence, Jira, Trello, Notion, Asana, Slack, Zoom | Airtable, Make (Integromat)
